**A message from our Discipline Lead  
for construction management and quantity surveying:**

## **Dr Dane Miller**

Welcome to our construction discipline which forms part of the Faculty of Society & Design at Bond University.

Our programs offer a variety of options across the industry. As one of the largest economic sectors, the construction industry seeks graduates with distinctive skills, knowledge, and practical experience. At Bond, our programs equip graduates with the necessary knowledge to deliver complex construction projects. Our offerings include professionally recognised qualifications that will enhance future career potential.

Construction is a fast-paced and evolving industry, and our programs are designed to provide graduates with access to a wide range of career pathways. These opportunities include building and construction management, contract administration, site management, facilities management, building services, quantity surveying, property development, project management, cost management and more.

Our construction programs pride themselves on the level of practical experience shared between our educators, in a field where this is so important. This experience is invaluable to our students and ensures graduates are equipped with the skills to apply innovative and adaptable solutions within complex environments - something which is highly sought after by the construction industry.

Our construction programs include offerings which are accredited by leading professional bodies. This allows graduates from these programs to differentiate themselves within the industry. Our programs include options internationally recognised by the Royal Institution of Chartered Surveyors (RICS) and the Chartered Institute of Building (CIOB) as well as being nationally accredited by the Australian Institute of Quantity Surveyors (AIQS). Graduates of the Bachelor of Construction Management and Quantity Surveying program are also eligible to apply for their Open Builder's Licence with the Queensland Building and Construction Commission (QBCC); as are graduates of the Master of Construction Practice and the Master of Construction Practice (Professional), upon completion of two optional elective subjects.

Our programs are based in Australia's first 6-star, Green Star designed educational building which delivers an unparalleled learning and teaching space. We aim to further develop the progressive principles on which our building was designed, in educating future construction professionals tasked with delivering projects required to keep pace with our expanding population.

**Dr Dane Miller**  
**Associate Professor of Construction**  
**Discipline Lead for Construction Management and Quantity Surveying**  
**Faculty of Society & Design, Bond University**

**A message from our Discipline Lead  
for project management, property and planning:**

## **Dr Amir Ghanbaripour**

Welcome to the project management, property and planning discipline. Bond University encourages each student to find their niche in the professional world. Our goal is for our built environment programs to reflect the best sustainable practices, serving as both a model for the future and a testing ground for future environmental leaders. There are three areas in our discipline:

**Project Management:** Whether you are combating climate change, upgrading a hospital, building a school, developing new software, or constructing a luxury hotel, you must run a project. You need project management in both your personal and professional life. The key to successfully delivering these projects and making changes lies in the hands of project managers. The ability to plan and manage any kind of project is an increasingly crucial talent for professionals in a wide range of industries. Even if you are currently employed in the project management area, there are always new skills and techniques to master or refresh. In these accredited programs, our educators have extensive knowledge and experience with a broad range of project management tools. They will guide you throughout your studies and empower you with the hard and soft skills necessary to stand out in the job market as a project manager in any industry or field, from law to software to construction to healthcare.

**Property:** This practical and accredited program, informed by our significant commercial and professional partnerships within the property industry, will educate you to adapt and flourish in the complicated and ever-changing property market, from valuation to real estate property rights. Capitalising on our outstanding industry connections, the program's curriculum is shaped by leading organisations and taught by educators who share their own professional experiences, enabling you to obtain a comprehensive grasp of the property development and management process, feasibility studies, and investment decisions, including the financial, physical, legal, and social dimensions.

**Planning:** We believe that planning has the power to transform the world and that effective planning ensures a fair and sustainable future. As the majority of the world's population currently resides in urban areas, there is a growing need for graduates with skills in designing and maintaining sustainable living environments. We offer subjects that confront several serious concerns, including climate change, poverty, affordable housing, and equal opportunity access. Given these global challenges, there is no better time to think deeply and critically about how we can better manage our built environment and develop more sustainable, efficient, equitable, and healthy communities. Our subjects allow students to investigate climate change adaptation and resilience, city economics, place-making concepts, and an appreciation of First Nations cultures.

Bond's Sustainable Development building is the first in Australia to receive the Green Building Council of Australia's 6-Star Green Star certification - Education PILOT Certified Rating for design. This is the very facility where our learners in the built environment degrees engage in lectures, tutorials, collaborative conversations, and debates with faculty and peers. Our students have the freedom to customise their education in accordance with their own aspirations and areas of interest because of our flexible programs. Students are well-prepared for careers in the built environment and related industries thanks to Bond's small classrooms, hands-on learning environments, and personalised instruction.

I look forward to welcoming you to campus and guiding you through your chosen pathway within the built environment discipline.

**Dr Amir Ghanbaripour  
Assistant Professor of Project Management  
Discipline Lead for Project Management, Property and Planning  
Faculty of Society & Design, Bond University**

# Diploma

Bond University diplomas take only eight months to complete allowing you to articulate straight into the third semester of a Bond University degree. Whether you're looking for a pathway to an undergraduate degree or contemplating a career change, Bond University's diploma programs are the ideal steppingstone to university studies.

## Diploma of Built Environment

Selection Rank (ATAR)\*

Starting

Duration

CRICOS course code 098537A

50

Jan, May, Sep

2 semesters (8 months)

The Diploma of Built Environment provides a foundation for a career in various property sectors. This program enables you to specialise in either property or construction management and quantity surveying.

### Key features

- Complete your diploma in only eight months.
- Integrate into the university environment from day one.
- Have the support of extra tutorials just for diploma students.
- Articulate into a corresponding bachelor's program<sup>^</sup>.

<sup>^</sup> Please get in touch with the Office of Future Students for advice.

### Further study at Bond

The Diploma of Built Environment is a two-semester program, allowing you to complete a qualification in just eight months. Upon successful completion of the diploma, you can pathway into the third semester of a Bond University undergraduate degree with a potential 80 credit points.

\* Entrance scores provided are indicative only for admission purposes and are subject to change. Please refer to our website for up-to-date entry requirements.

## A collaborative space for the eco leaders of tomorrow

The environmentally sustainable extension was formally opened in November 2020 thereby completing the Society & Design Precinct, incorporating the Abedian School of Architecture and the existing Sustainable Development Building.

The extension was designed around the concept of bringing people together in flexible and inspiring teaching spaces. Purpose built, housing a state-of-the-art 40 seat computer laboratory as well as three flexible learning spaces, and an extensive social area, the addition enables students to learn, engage and collaborate with their peers, teaching staff and industry guests.

The extension contains recycled materials, including railway sleepers and power poles, contains enough solar panels to power 10 homes, and features charging stations for electric vehicles.

In the Faculty of Society & Design, we want to be at the forefront of contemporary approaches to pedagogy and that means we have to think about not just what we teach, but how and where we teach. As a Faculty, we are challenging ourselves to provide the most active, engaged and authentic learning experience possible, the new building with its flexible and innovative set up will help us do this.

## Bachelor of Construction Management and Quantity Surveying

Selection rank  
ATAR / IB\*

Starting

Duration

CRICOS course code 078183K

65 / 24

Jan, May, Sep

6 semesters  
(2 years)

The Bachelor of Construction Management and Quantity Surveying covers a comprehensive range of subjects, focusing on the management and delivery of complex construction projects. The discipline prides itself on the level of practical experience shared between our educators in a field where this is so important. This experience is invaluable to our students and ensures graduates are equipped with the skills to apply innovative and adaptable solutions within complex environments - something which is highly sought after by the construction industry.

### Key features

- Learn in the University's Sustainable Development Precinct, which promotes the sustainable practices of tomorrow.
- Graduate with a professionally recognised qualification.
- Apply theoretical knowledge learnt in the classroom to practical settings.

### Professional recognition

Students graduating with this degree are internationally recognised by the Royal Institution of Chartered Surveyors (RICS) as well as the Chartered Institute of Building (CIOB).

This program is also nationally accredited with the Australian Institute of Quantity Surveyors (AIQS), and meets the educational requirements set by the Queensland Building Construction Commission (QBCC) for the granting of an Open Builders Licence<sup>^</sup>.

<sup>^</sup> QBCC manage a wide range of licences and licence levels, please refer to their website for specific application requirements.

## Lucy Qi

ASSOCIATE DIRECTOR AT FTI CONSULTING.  
BACHELOR OF CONSTRUCTION MANAGEMENT  
AND QUANTITY SURVEYING ALUMNA.

(CRICOS 078183K)

"I would recommend Bond University for its outstanding reputation for academic excellence and its commitment to providing a world-class education. I appreciated the personalised and hands-on approach and enjoyed the social activities as well as the friendships I've made along the way. This degree equips graduates with highly specialised skills that are in demand in the construction industry, provides unlimited career opportunities, and allows graduates to be well-prepared in a practical environment. Bond University is dedicated to preparing students for success in their career and life beyond graduation, making it a top choice for those seeking a high-quality education."

### Professional outcomes

The Bachelor of Construction Management and Quantity Surveying prepares graduates for a wide range of positions within the construction industry. Potential career outcomes include:

- Construction management
- Estimation
- Quantity surveying
- Property development
- Contract administration
- Building services

### Further study at Bond

Graduates can pursue a Master of Project Management (CRICOS 078813G), or a Master of Building Information Modelling and Integrated Project Delivery (CRICOS 099719J).

\* Entrance scores provided are indicative only for admission purposes and are subject to change.

# ADCO x Bond Mentor Excellence Program\*

Bond University and ADCO Constructions are proud to announce the launch of our Mentor Excellence Program, a groundbreaking initiative aimed at celebrating and strengthening the invaluable industry connections between academia and the construction sector.

This partnership provides undergraduate and postgraduate construction students in the Faculty of Society & Design with the unique opportunity to connect with industry professionals and start building valuable networks. This exposure to the industry aims to spark connections between Bond students and ADCO representatives, as well as faculty members and fellow students who share a passion for construction.

The ADCO Constructions x Bond University Mentor Excellence Program held its official launch event in October 2023 and has now formally commenced mentor/mentee intakes\*. Students who complete the program will receive an ADCO Mentor Excellence Program certificate upon graduating. We look forward to witnessing the transformative impact of this program on our students' academic journey and professional development.

ADCO Constructions has also made a significant contribution to this program by generously supplying Personal Protective Equipment (PPE), for all newly commencing construction students at Bond University. These valuable resources, alongside the mentoring program, will play a pivotal role in enhancing our students' learning experiences through fieldwork and preparing them for successful careers in the construction industry. Bond is proud to be part of an initiative that unites education and industry, offering valuable mentorship opportunities and unique insights.

\*Strict selection criteria apply.

## Bachelor of Project Management

Selection rank  
ATAR / IB\*

Starting

Duration

CRICOS course code 0101294

65 / 24

Jan, May, Sep

6 semesters  
(2 years)

More than ever, project managers are in demand across government, community, and private business sectors. Projects are vehicles of change and project managers are change agents.

The Bachelor of Project Management equips students with the skills to become effective decision-makers and contribute to stronger financial, social, ethical, and environmental outcomes on projects across a wide range of industries. Project management roles span construction, property development, information technology, healthcare, climate and environment, civil infrastructure, tourism, and more.

### Key features

- Learn how to apply digital and innovative tools in managing projects successfully.
- Become an effective decision maker.
- Explore content built around the PMBOK® Guide, which is the international standard for the project management discipline.
- Gain critical leadership skills.
- Bond University is the first and only university in Queensland to offer a direct career pathway from high school to professional certification as a project manager.

### Professional recognition

Project management is a global profession, with over one million certified practitioners in the Project Management Institute (PMI) alone. This program is internationally accredited by the Royal Institution of Chartered Surveyors (RICS) and the Project Management Institute Global Accreditation Centre (PMI-GAC), as well as nationally endorsed by the Australian Institute of Project Management (AIPM). These prestigious endorsements are testament to our commitment to delivering the highest quality of education and industry relevance.

### Professional outcomes

Upon completion of the Bachelor of Project Management you will have the skills needed to keep up with trends, lead a team and problem solve in today's digital era, whichever industry you choose. Potential career outcomes include:

- Project management
- Portfolio management
- Program management

### Further study at Bond

Option to articulate to our Master of Project Innovation (CRICOS 0100041).

## Bachelor of Property

Selection rank  
ATAR / IB\*

Starting

Duration

CRICOS course code 078181A

65 / 24

Jan, May, Sep

6 semesters  
(2 years)

The property sector in Australia is dynamic and expanding, and there is a need for graduates with up-to-date, in-depth knowledge of current legislations, new technologies, and future trends in real estate and development.

The Bachelor of Property covers a comprehensive range of subjects within the property industry, including construction practice, feasibility studies, finance, investment, property management, and sustainable urban development. It also offers students the option to specialise in property valuation.

### Key features

- Gain professional accreditation from some of the industry's leading professional bodies.
- Learn from nationally and internationally recognised industry professionals.
- Graduate sooner with Bond's accelerated degrees and kickstart your career.

### Professional recognition

Graduates are professionally recognised as academically qualified by the Royal Institution of Chartered Surveyors

\* Entrance scores provided are indicative only for admission purposes and are subject to change.

(RICS) and the Australian Property Institute (API). Graduates who successfully complete the Bachelor of Property are eligible to apply to be professionally recognised by RICS and by the API as Property Valuers and as Certified Practising Valuers (CPV) respectively, after a relevant professional practice period. These professional qualifications enable application for valuer registration by the Valuers Registration Board of Queensland.

### Professional outcomes

The Bachelor of Property prepares graduates for a range of positions within the property valuation, development, and management sectors. Potential career outcomes include:

- Certified property valuation
- Property research and development
- Development management
- Portfolio management

### Further study at Bond

Take your skill set to the next level with a Master of Project Management (CRICOS 078813G), or a Master of Building Information Modelling and Integrated Project Delivery (CRICOS 099719J).

## FSD program accreditation

Gaining endorsement by accrediting bodies is of great importance to the Faculty of Society & Design in developing programs that meet industry standards. Accreditation benefits our students by producing graduates who are ready for the workforce and eligible for professional membership. Visit the website for the full list of our degrees and programs which have received accreditations with industry institutions.

## Intensive mode delivery (postgraduate)

All postgraduate programs in the area of built environment commenced intensive mode delivery in January, 2023. Subjects are generally delivered as intensive blocks of study rather than weekly classes. Intensive mode delivery is a compact and time efficient way to complete a postgraduate qualification with minimal impact on professional and personal lifestyles.

## Samantha Hiller

BACHELOR OF PROPERTY ALUMNA  
DEVELOPMENT MANAGER AT FITENI.  
2024 UDIA QLD EMERGING LEADER.  
(CRICOS 078181A)

"Bond is an entirely unique University experience. From the small class sizes to the state-of-the-art facilities, to the global alumni network you always have access to. I was a sponge throughout my two years at Bond, absorbing knowledge, learning new skills, and expanding my view of the world and myself. Study at Bond is fast-paced, so I learnt organisation skills and time management. I also learnt how to think critically, and I carry this forward with me every day to analyse problems to find the most optimal solution."

- Graduate Diploma in Building Surveying<sup>^</sup>  
Duration: 3 semesters (1 year)
- Graduate Diploma of Valuation and Property Development  
Duration: 2 semesters (8 months) (CRICOS 085560J)

<sup>^</sup>Only available to domestic students.

## Master of Building Information Modelling and Integrated Project Delivery

Starting

Duration

CRICOS Course Code 099719J

Jan

3 semesters  
(1 year)

This cutting-edge program has been designed in strong collaboration with industry to assist construction and other built environment professionals to upskill, in order to comply with the stringent practice requirements being demanded by government and knowledgeable private sector clients, regarding the use of Building Information Modelling (BIM), Lean Construction Practice (Lean), and Integrated Project Delivery (IPD). The Master of Building Information Modelling and Integrated Project Delivery program is delivered in intensive mode and can be completed in one year of full-time study. You will complete eight foundational microcredential subjects that cover key industry knowledge, and these will be reinforced with a capstone subject (total of 40 credit points) in which students work in teams on a realistic BIM / Lean / IPD project that requires application, analysis, and synthesis of complex 'project' data. Limited placement opportunities may be available as a capstone for approved students based on meeting the required performance criteria.

Note: While the program does cover various BIM-related technologies, it does not prepare students to be specialist technicians in the niche areas of the technologies covered by the curriculum.

### Key features

- Developed in collaboration with industry to meet demands of government and industry, and led by experienced industry experts at our Brisbane location.
- Eight introductory subjects form the foundation for advanced studies and practical experience, leading to successful completion of the master's program.
- Intensive mode delivery, a compact and time efficient way to complete your BIM qualification with minimal impact on professional work commitments and personal lifestyle.

- Highly practical and interactive learning, with studio-based capstone projects to reinforce assimilation of knowledge, and develop finely honed project management skills.
- This program is accredited by buildingSMART Australasia.

### Professional recognition

Bond's Master of Building Information Modelling and Integrated Project Delivery prepares graduates to meet the immediate and long-term needs of government and industry as they continue to develop infrastructure and construction projects for the benefit of the community. The program components align with the BIM Framework of buildingSMART Australasia, the open standards of buildingSMART International, the principles espoused by the Lean Construction Institutes of Australia, the United Kingdom and the United States of America, and internationally recognised principles of IPD.

### Professional outcomes

This program provides graduates with a competitive edge and equips them with the skills to pursue careers as managers of the modern construction and infrastructure project design and delivery systems. Potential career outcomes include:

- BIM project management
- BIM (schedule) consultation
- 5D BIM (cost) consultation

All BIM and IPD programs are delivered from Bond University, Brisbane location.

## Master of Building Surveying

Starting

Duration

CRICOS Course Code 071287C

Jan, May, Sep

4 semesters  
(1 year, 4  
months)

The Master of Building Surveying offers you the chance to increase your knowledge in the field of building surveying. You will study with world-class academics and experienced practitioners in one of Australia's first 6-star, Green Star designed educational buildings, which delivers an unparalleled learning and teaching space. The program comprises two specialist subjects plus six shared core subjects. Completion of a further four postgraduate elective subjects, selected from across the university will allow you to graduate with a Master of Building Surveying.

### Key features

- Intensive mode delivery.
- Learn in the University's Sustainable Development Precinct, promoting sustainable practices of tomorrow.
- Graduate with a professionally recognised qualification.
- This program is accredited by the Royal Institution of Chartered Surveyors (RICS), the Queensland Building & Construction Commission (QBCC), the Australian Institute of Building Surveyors (AIBS), and NSW Fair Trading.

### Professional recognition

This program is recognised internationally by the Royal Institution of Chartered Surveyor's (RICS) and nationally by the Australian Institute of Building Surveyor's (AIBS). NSW Fair Trading and the Queensland Building and Construction Commission (QBCC) also recognise the AIBS accreditation. This satisfies the educational requirement for accreditation at the level of Building Certifier Levels 1, 2, and 3. Upon gaining accreditation with the AIBS or RICS, graduates may also be eligible for a licence as a building certifier with the QBCC<sup>^</sup>.

<sup>^</sup> QBCC manage a wide range of licences and licence levels, please refer to their website for specific application requirements.

### Professional outcomes

Master of Building Surveying graduates will, with sufficient relevant experience, be able to practice as accredited building surveyors and certifiers for local government, or as private certifiers. Potential career outcomes include:

- Building surveying
- Quantity surveying
- Quality control
- Building inspection and regulation

## Ahmad Sammani

DIRECTOR AT ACCREDIA. GRADUATE DIPLOMA  
IN BUILDING SURVEYING ALUMNUS.

(CRICOS N/A)

"I was introduced to the building surveying field by one of my acquaintances. I did the research, and it appealed to me. Bond's program was very suitable for my needs as an employed professional.

It offered part-time studies that would not affect my employment, nor put a strain on my work-life balance.

Bond gave me the tools I need to understand the certification process and the responsibilities I will be facing as a building surveyor."

and planning*

## Master of Construction Practice

Starting

Duration

CRICOS Course Code 071288B

Jan, May, Sep

4 semesters  
(1 year, 4  
months)

By studying a Master of Construction Practice at Bond University, graduates are equipped with the necessary knowledge and management skills to deliver complex construction projects. This program covers a comprehensive range of subjects in the field of construction practice, and addresses a range of topics including: building structures and soil mechanics, construction technology and techniques, plant and equipment, contract administration, building measurement, finance and cost planning, project management, refurbishment, retrofitting and risks. It also contains a strong sustainability theme which equips you with distinctive skills that are highly sought after in the built environment industry. The Master of Construction Practice is professionally recognised by some of Australia's leading professional bodies. This allows graduates to differentiate themselves within the industry and enhance their career potential in the field of construction practice.

### Key features

- Gain professional recognition by some of Australia's leading professional bodies.
- Learn via intensive mode delivery.
- Learn in the University's Sustainable Development Precinct, promoting sustainable practices of tomorrow.
- Pathway into one of the largest industries in the world, with a wide variety of career opportunities.
- Benefit from the most comprehensive and up-to-date industry insights from leading academics in the field.

### Professional recognition

Graduates are internationally recognised by the Royal Institution of Chartered Surveyors (RICS) as well as the Chartered Institute of Building (CIOB). They are also nationally accredited with the Australian Institute of Quantity Surveyors (AIQS), and upon completion of two optional elective subjects, graduates are eligible to apply for their Open Builder's Licence with the Queensland Building and Construction Commission (QBCC)^.

^ QBCC manage a wide range of licences and licence levels, please refer to their website for specific application requirements.

### Professional outcomes

The Master of Construction Practice will equip you with a comprehensive knowledge of sustainable development and will provide you with access to a wide range of career pathways in the construction industry. Potential career outcomes include:

- Construction management
- Estimation
- Quantity surveying
- Cost planning management
- Contracts management

## Sreeja Biswas

MASTER OF CONSTRUCTION PRACTICE  
(PROFESSIONAL) ALUMNA. CIVIL ENGINEER AND  
ASSOCIATE SUPERINTENDENT AT ANVELO, NSW.  
(CRICOS 071289A)

"The Master of Construction Practice (Professional) is delivered in intensive mode, which means it's compact and time-efficient, and didn't have a significant impact on my professional or personal life. Some classes are broken into smaller groups for software learning. I've loved gaining experience in programs like Cost X, Cubit, AutoCAD, and developing my understanding of tools used in the workplace. With the relevant subjects that I studied in my program, transitioning into a professional role in civil engineering and project management has been smoother than expected. Bond has helped me polish my time management skills so that I feel very prepared for the current phase of my life."

Learn more:

***Construction management***

## Master of Project Innovation

Starting

Duration

CRICOS Course Code 0100041

Jan, May, Sep

4 semesters  
(1 year, 4  
months)

The Master of Project Innovation explores a number of topic areas centred around emerging job descriptions for project managers, drawn from product manager, designer thinker, change agent, agile coach, business analyst and entrepreneur. The program comprises six core subjects, research methods, a research project (20 credit points), and three elective subjects.

### Key features

- Earn digital badges for up to six career specialisations relevant to Project Managers.
- Become an expert in your own area of specialisation by undertaking a research project relevant to your professional experience.
- Learn from award-winning experts who have significant teaching, research, and practical experience leading innovation projects in Australia and abroad.

### Professional recognition

Project innovation is expansive and multi-dimensional in its implementation across industries as diverse team collaboration, and the ability to adapt quickly to opportunities and explore alternative solutions, becomes an increasingly important feature of our modern economy. Graduates can apply their specialist knowledge to a wide variety of opportunities across engineering, information technology, events and logistics, marketing and communication, construction, finance and banking, agriculture, and built environment.

### Professional outcomes

Graduates of the Master of Project Innovation are equipped with the skills to take on roles such as:

- Product management
- Change management
- Business analysis
- Strategic development

## Master of Project Management

Starting

Duration

CRICOS Course Code 078813G

Jan, May, Sep

4 semesters  
(1 year, 4  
months)

Project management skills are in high demand across almost every commercial sector. The Master of Project Management provides a comprehensive business-ready foundation that will equip students from any background with the expert knowledge required to develop a career in project management. The program features four distinct study themes: strategy, sustainability, managing complex problems and teams, and virtual teams and global working. External speakers from leading investment banks, credit agencies and portfolio fund managers contribute to case studies and workshops.

### Key features

- Highly accredited program with both national and international recognition.
- Flexible, interactive and hands-on study options available to allow for concurrent work experience.
- Exchange opportunities with other PMI-GAC accredited universities in other countries.
- Learn at the only Australian university with project management programs recognised by all three leading industry bodies - AIPM, PMI-GAC and RICS.

### Professional recognition

The Master of Project Management at Bond is internationally recognised by the Royal Institution of Chartered Surveyors (RICS) and the Project Management Institute Global Accreditation Centre (PMI-GAC), as well as nationally endorsed by the Australian Institute of Project Management (AIPM). This accreditation benefits Bond's project management students by ensuring they study programs that measure up to industry standards meaning they graduate ready for the workforce and eligible to apply for professional membership.

### Professional outcomes

This degree will provide you with the ability to progress into a wide range of pathways in project management in all areas of industry, government, and the not-for-profit sector, both in Australia and overseas. Potential career outcomes include:

- Project management and consulting
- Portfolio management
- Program management

## Master of Valuation and Property Development

Starting

Duration

CRICOS Course Code 085561G

Jan, May, Sep

4 semesters  
(1 year, 4  
months)

The Master of Valuation and Property Development is an industry based, accredited program aimed at anyone looking to either capitalise upon their existing property experience or seeking a pathway into the industry from a different or adjacent field. Fulfilling the residential and non-residential needs of Australia remains a priority, and requires graduates with the capabilities and skills to work in a dynamic and unpredictable market. This program is designed to equip you with strong knowledge and advanced technical skills applicable to a variety of career paths such as investment, finance, asset management and research. This degree also provides the opportunity to specialise in property valuation.

### Key features

- Gain a qualification professionally recognised by some of Australia's leading industry bodies.
- Intensive mode delivery.
- Small class sizes and personalised approach to learning.

### Professional recognition

Graduates of the Master of Valuation and Property Development from Bond University are internationally recognised by the Royal Institution of Chartered Surveyors (RICS). Graduates with a cognate undergraduate degree, who meet professional practice requirements, will also qualify for membership with the Australian Property Institute (API) and as a Certified Practicing Valuer with the Valuers Registration Board of Queensland.

### Professional outcomes

This degree will provide you with the high-level skills required to establish leadership within the property industry, and expert knowledge which can be applied across urban development industries in Australia and overseas. Potential career outcomes include:

- Certified property valuation
- Property development
- Portfolio management
- Valuation management

# Higher Degree Research (HDR) programs

Master of Philosophy	Starting	Duration
CRICOS Course Code 072092F	Jan, May, Sep	2 years

The Master of Philosophy develops independent research skills and the ability to relate a specific research topic to a broad framework of knowledge. The program places a major emphasis on independent enquiry (initiative), a thorough understanding of domain-specific knowledge, competence in research methodologies and the ability to communicate research results. This program serves as a pathway to the Doctor of Philosophy (PhD).

Doctor of Philosophy	Starting	Duration
CRICOS Course Code 063150J	Jan, May, Sep	4 years

The Doctor of Philosophy (PhD) sees candidates undertake significant original research to develop specialist knowledge and thorough methodological capacity. This program provides students with the necessary research skills for academic careers in the university or research sector, or professional employment. Prior to formal application, intending applicants need to consider the specific research topic they wish to investigate, and a consultation with a member of the academic staff will determine whether the Faculty can provide the appropriate supervision. A Doctor of Philosophy is an internationally recognised research degree and is a pathway to an academic or research career.

## Professional master's programs

At Bond University, we offer a range of Professional master's programs. These programs include a Professional Portfolio that extends the length of the degree by 20 weeks.

The Professional Portfolio\* is a 45-credit point subject available to master's (Professional) students in the Faculty of Society & Design. This subject is strongly experiential and encourages students to develop their professional skills in a real-world environment.

The subject ensures that students combine self-analysis and reflective learning skills with professional methodologies, to expand analytic and strategic thinking capabilities. It provides practical experience for students to develop their skills in a profession relevant to their master's specialisation.

The Professional Portfolio subject cannot be commenced until the student has successfully completed all core components of the related master's degree.

The Professional Portfolio is offered for the following master's programs:

- Master of Construction Practice (Professional) (CRICOS 071289A)
- Master of Project Management (Professional) (CRICOS 078182M)
- Master of Valuation and Property Development (Professional) (CRICOS 085562G)

\* Professional Portfolio subject may differ slightly between programs.

Professional master's programs are only available to international students.

## Combined Project Management master's program options

- Master of Business Administration / Master of Project Management (CRICOS 085563F)
- Master of Communication / Master of Project Management (CRICOS 088315J)

## Conor Bell

PROJECT MANAGER. SENIOR RESEARCH ASSISTANT.  
MASTER OF PROJECT MANAGEMENT (PROFESSIONAL) ALUMNUS.

(CRICOS 078182M)

"Bond University played a crucial role in shaping my project management skills. It was a comprehensive course that covered all aspects of project management, from the initial planning and development phase to the final stage of project execution. The program equipped me with the knowledge and expertise needed to manage resources, stakeholders, and risks effectively.

Bond is more than a university. It's a small nurturing community that encourages all its members to achieve their goals. The campus still takes my breath away every time I step on it, and being part of the Bond community is truly an honour. Bond University also makes the learning experience enjoyable and has influenced me to continue my studies and pursue a PhD, something I never imagined for myself."

# The way of the future

## Master of Project Innovation / Master of Project Management

Starting      Duration

CRICOS Course Code 099216K

Jan, May, Sep

6 semesters  
(2 years)

The world of project management is changing. Projects and programs are increasingly creative in nature, calling for innovative thinking to deal with complex business environments. Innovation in project management requires agile practices that can respond quickly to opportunities, exploration of alternative solutions and the freedom to experiment. Bond's new approach is not constrained by conventional ideologies and the fear of failure. The Master of Project Innovation and Master of Project Management are offered as a combined program (MPI+MPM) that reduces the overall duration of study by 25 per cent. Our program is designed to enhance graduate capabilities to meet future challenges in professional practice and up-skill knowledge over time. Project innovation is the next big thing for the project management discipline.

### Key features

- Work experience opportunities within the University's Transformer initiative.
- Digital badges for up to six career specialisations.
- Gain a professional qualification recognised by some of Australia's leading industry bodies.

### Professional recognition

The Master of Project Management at Bond is internationally recognised by the Royal Institution of Chartered Surveyors (RICS) and the Project Management Institute Global Accreditation Centre (PMI-GAC), as well as nationally endorsed by the Australian Institute of Project Management (AIPM).

### Professional outcomes

Professionals with project management skills are in high demand across a wide variety of commercial industries, while innovation is increasingly needed to manage the financial, social, political, and environmental aspects of complex projects, and realise value for stakeholders. Graduates of the Master of Project Innovation and Master of Project Management are equipped to pursue a range of careers including:

- Product management
- Business analysis
- Change management
- Project execution and leadership
- Strategic development

# Capstone project: enriching community experience

## What is a capstone project?

A capstone project is also commonly referred to as a capstone experience, as it is multifaceted and experiential by nature. Capstone projects are designed to encourage students to think critically, solve challenging problems, and develop skills such as communication, public speaking, planning, time management, collaboration, teamwork and goal setting; all to assist with ease of transition into the workplace while also building life-experience.

The Capstone Project subject (SSUD13-300) provides an opportunity to undertake an interdisciplinary group investigation of a built environment, bringing together a student's understanding around the development of a project brief, active project implementation, and the final reporting and evaluation processes for a real, quantifiable project. Students undertaking the subject will apply their learned skills and knowledge towards improving and contributing to a wider community.

## Ongoing opportunities

In previous years, our students have travelled to the township of Kirakira in the Solomon Islands, where they worked closely with the community and leaders to develop community infrastructure designed to support the agricultural trade and grow the local economy through multi-purpose spaces. These projects have been embraced by both students and locals and represent an ongoing partnership to empower villages in the Solomon Islands to develop as a vibrant and economically sustainable community, by embracing and building on the local culture and identity of the town.
